

PROPOSED GAAP TAXONOMY IMPLEMENTATION GUIDE

Version 1.0

Issued: November 14, 2022
Comments Due: December 14, 2022

Financial Services—Investment Companies (Including SEC S-X Schedules for Business Development Companies)

(2023 GAAP Taxonomy*)

GAAP Financial Reporting Taxonomy and SEC Reporting Taxonomy (collectively referred to as the “GAAP Taxonomy”) Implementation Guide Series

* Pending SEC Acceptance. The 2023 Taxonomy is subject to change until published as final.

This draft is issued by the Financial Accounting Standards Board (FASB) to solicit views on this proposed GAAP Taxonomy Implementation Guide.
Written comments should be addressed to:
Chief of Taxonomy Development
File Reference No. 2023-2550

Financial Accounting Standards Board

The GAAP Taxonomy Implementation Guide is not authoritative; rather, it is a document that communicates how the GAAP Financial Reporting Taxonomy and the SEC Reporting Taxonomy (collectively referred to as the “GAAP Taxonomy”) are designed. It also provides other information to help a user of the GAAP Taxonomy understand how elements and relationships are structured.

Notice to Recipients of This Draft

The FASB staff invites individuals and organizations to send written comments on all matters in this draft. Responses from those wishing to comment on the proposed GAAP Taxonomy Implementation Guide must be received in writing by December 14, 2022. Interested parties should submit their comments by email to xbrlguide@fasb.org, File Reference No. 2023-2550. Those without email should send their comments to “Chief of Taxonomy Development, File Reference No. 2023-2550, FASB, 801 Main Avenue, PO Box 5116, Norwalk, CT 06856-5116.” Do not send responses by fax.

The FASB will make all comment letters publicly available by posting them to the [GAAP Taxonomy Comment Letters](#) page.

An electronic copy of this proposed GAAP Taxonomy Implementation Guide is available on the FASB’s [website](#).

Questions for Respondents

The FASB staff invites individuals and organizations to comment on the content in this proposed GAAP Taxonomy Implementation Guide (Guide) for the GAAP Financial Reporting Taxonomy and the SEC Reporting Taxonomy (collectively referred to as the “GAAP Taxonomy”) and, in particular, on the questions below. Respondents need not comment on all of the questions.

Comments are requested from those who agree with the content and those who disagree with the content. Comments are most helpful if they identify and clearly explain the issue or question to which they relate. Those who disagree are asked to describe their suggested alternative(s), supported by specific reasoning and examples, if possible.

1. Do you agree the examples provide sufficient information to apply the GAAP Taxonomy elements and modeling for the reporting by investment companies? If not, why are they not sufficient?
2. Are there other examples for the reporting by investment companies that would be beneficial to include in the Guide? If yes, what are they?
3. Do you agree that the modeling structure within the GAAP Taxonomy for the reporting by investment companies facilitates data consumption and improves comparability? If not, why not?
4. Do you agree that the Guide addresses common reporting practices for the reporting by investment companies? If not, what common reporting practices are not included?
5. Are there difficulties, challenges, or unintended consequences in applying the modeling structure for the reporting by investment companies as illustrated in the Guide? If yes, what are they?
6. Is there another approach that would provide a better modeling structure for the reporting by investment companies? If yes, what alternative would you propose?

Proposed GAAP Taxonomy Implementation Guide for Investment Companies (Including SEC S-X Schedules for Business Development Companies)

Overview

The purpose of this proposed Guide is to demonstrate the modeling for the reporting by investment companies. These examples are not intended to encompass all of the potential modeling configurations or to dictate the appearance and structure of an entity's extension taxonomy or its financial statements. The examples are provided to help users of the GAAP Taxonomy understand how the modeling for reporting by investment companies is structured within the GAAP Taxonomy. The examples are based on the assumption that the entity meets the criteria for reporting as an investment company under Generally Accepted Accounting Principles (GAAP) and/or U.S. Securities and Exchange Commission (SEC) authoritative literature. In addition, the reported line items within the examples do not include all reporting requirements and represent only partial disclosures and statements for illustrative purposes.

While constituents may find the information in the Guide useful, users looking for guidance to conform to SEC eXtensible Business Reporting Language (XBRL) filing requirements should look to the SEC EDGAR Filer Manual and other information provided on the SEC's website at www.sec.gov/structureddata.

This Guide focuses on detail tagging only (Level 4); it does not include elements for text blocks, policy text blocks, and table text blocks (Levels 1–3).

Two sections are included in this Guide:

- **Section 1: Overview of Modeling:** This section provides an overview of the modeling for the reporting by investment companies.
- **Section 2: Examples of Modeling:** This section includes examples of modeling for the reporting by investment companies.
 - Example 1—[Consolidated Statement of Assets and Liabilities](#)
 - Example 2—[Consolidated Statements of Operations](#)
 - Example 3—[Consolidated Statement of Changes in Net Assets](#)
 - Example 4—[Schedule of Investments in Securities of Unaffiliated Issuers](#)
 - Example 5—[Investments in Affiliates](#)
 - Example 6—[Schedule of Open Forward Foreign Currency Contracts](#)

General Information

- (1) A legend for dimensions and domain members has been provided to associate with facts contained in the notes to the financial statements. Extension elements are coded using “Ex.” Legends specific to the examples are provided in Figure x.2 of each example.

- (2) Elements that have an instant period type and elements that have a duration period type are indicated as such in Figure x.2 of each example. Instant elements have a single date context (such as December 31, 20X1) and duration elements have a starting and ending date as their context (such as January 1 through December 31, 20X1).
- (3) The XBRL report view (Figure x.3 in each example) does not include all information that may appear in an entity's instance document. The XBRL report view is provided for illustrative purposes only.
- (4) For elements contained in the GAAP Taxonomy, the standard label is as it appears in the GAAP Taxonomy. For extension elements, the standard label corresponds to the element name. For information about structuring extension elements, see the *SEC EDGAR Filer Manual*.
- (5) Values reported in XBRL are generally entered as positive, with the exception of certain concepts such as net income (loss) or gain (loss).
- (6) Preferred labels (Figure x.3 in each example) are the labels created and used by an entity to show the line item captions in its financial statements.
- (7) Additional information for values reported using extensible enumerations can be found in the GAAP Taxonomy Implementation Guide, *Extensible Enumerations: A Guide for Preparers*.

Section 1: Overview of Modeling

The modeling distinguishes between the use of typed dimensions and explicit dimensions. A typed dimension is intended to be used when there is specific information for each issue of an investment or each derivative contract. An explicit dimension is intended to be used for a disaggregation by a specific characteristic (e.g., type or industry).

Typed dimensions for each issue of investment and for each contract by type of derivative are intended to be used for the schedule of investments and the derivative schedules to associate the specific information for each issue or contract. The members for the typed dimension are unique for each issue or contract and are not present in the extension taxonomy. The examples in this Guide illustrate the use of the typed dimensions “Investment, Identifier [Axis]” (A4), which is intended to be used to tag each investment and its related information, and “Open Forward Foreign Currency Contract, Identifier [Axis]” (A8), which is intended to be used to tag each open forward foreign currency contract and its related information. Using a typed dimension associates the information for each issue or contract to enable users of the data to understand what is information for each issue and what is not disaggregating information.

The explicit dimension “Investment, Issuer Affiliation [Axis]” (A1) and applicable members are intended to be used to tag the value of the investments disaggregated by affiliation of issuer representing the total by affiliation and is not specific to an individual issue. “Investment, Unaffiliated Issuer [Member]” (M1) is intended to be used to tag the total value of the investment in unaffiliated issuers. “Investment, Affiliated Issuer [Member]” (M2) is intended to be used to tag the total value of the investment in affiliated issuers. “Investment, Affiliated Issuer, Controlled [Member]” (M3) and “Investment, Affiliated Issuer, Noncontrolled [Member]” (M4) are children of “Investment, Affiliated Issuer [Member]” (M2) and intended to be used to tag the total values of investments in controlled affiliated issuers and noncontrolled affiliated issuers, respectively. Using the explicit dimension only for disaggregating totals assists users of the data in understanding the values that are summations.

The extensible enumeration element “Investment, Issuer Affiliation [Extensible Enumeration]” (XL75) is intended to be used with “Investment, Identifier [Axis]” (A4) for each issue to communicate affiliation when it is not a disaggregating characteristic. The dimension “Investment, Issuer Affiliation [Axis]” (A1) and applicable members are intended to be used when the value is a disaggregation by affiliation of issuer of investment. Other extensible

enumeration elements have been added to the GAAP Taxonomy including, but not limited to, “Investment, Issuer Name [Extensible Enumeration]” (XL76), “Investment, Type [Extensible Enumeration]” (XL77), “Investment, Variable Interest Rate, Type [Extensible Enumeration]” (XL80), “Investment, Industry Sector [Extensible Enumeration]” (XL83), and “Derivative Asset, Counterparty Name [Extensible Enumeration]” (XL98) to communicate information about each issue of investment or contract.

Section 2: Examples of Modeling

Example 1—Consolidated Statement of Assets and Liabilities

This Example illustrates the modeling for the consolidated statement of assets and liabilities reported by an investment company.

ABC Company Consolidated Statements of Assets and Liabilities As of December 31, 20X1 (in thousands, except share and per share data)		
Investments in securities of unaffiliated issuers, at fair value (amortized cost of \$19,292 L2, A1:M1)	L1, A1:M1	\$ 21,721
Investments in and advances to affiliates, controlled, at fair value (amortized cost of \$544 L2, A1:M3)	L1, A1:M3	520
Investments in and advances to affiliates, not controlled, at fair value (amortized cost of \$400 L2, A1:M4)	L1, A1:M4	480
Total investments, at fair value (amortized cost of \$20,236 L2)	L1	22,721
Unrealized appreciation on foreign currency forward exchange contract XL4	L3	425
Variation margin receivable on futures contracts XL6	L5	3
Cash	L7	199
Dividend and interest receivable	L8	46
Receivable from investment securities sold	L9	78
Deposits with brokers for securities sold short	L10	1,555
Other assets	L11	26
Total assets	L12	25,053
Liability for securities sold short at fair value (proceeds: \$1,555 L14)	L13	1,673
Liability for call options written at fair value (premiums received: \$110 L16)	L15, A2:M5	230
Unrealized depreciation on OTC swap contract	L15, A2:M6	129
Total derivative liability	L15	359
Variation margin payable on futures contracts XL18	L17	12
Distribution payable	L19	137
Liability for investment securities purchased	L20	52
Accrued expenses	L21	2,008
Other liabilities	L22	632
Total liabilities	L23	4,873
Common stock \$0.001 par value L25 , 10,000,000 shares authorized L26 , 10,000,000 shares issued L27 , and 10,000,000 shares outstanding L28	L24	100
Paid-in capital	L29	16,084
Distributable earnings	L30	3,996
Net assets	L31	\$ 20,180
Net asset value per share	L32	\$ 2.018

Figure 1.1

L32	Net Asset Value Per Share	Net asset value per share					2.018		

Figure 1.3 (continued)

Notes:

- “Investment Owned, at Fair Value” (**L1**), “Investment, Issuer Affiliation [Axis]” (**A1**), and the applicable member are intended to be used to tag the fair value of the investment portfolio disaggregated by the affiliation of the issuer of the investment. “Investment, Unaffiliated Issuer [Member]” (**M1**) is intended to be used to tag the fair value of investments in unaffiliated issuers. “Investment, Affiliated Issuer, Controlled [Member]” (**M3**) is intended to be used to tag the fair value of controlled investments in affiliated issuers. “Investment, Affiliated Issuer, Noncontrolled [Member]” (**M4**) is intended to be used to tag the fair value of noncontrolled investments in affiliated issuers.
- “Derivative Liability” (**L15**), “Derivative Instrument [Axis]” (**A2**), and the applicable member are intended to be used to tag the reported value of derivative liabilities disaggregated by type of derivative contract. “Call Option [Member]” (**M5**) is intended to be used to tag the derivative liability for the call option contract. “Swap [Member]” (**M6**) is intended to be used to tag the derivative liability for the swap contract.
- “Derivative Asset, Type [Extensible Enumeration]” (**XL4**) is intended to be used for the value of unrealized appreciation on foreign currency forward exchange contract because it is not disaggregated by type of derivative asset and the type characteristic applies to the report-wide value. If the fact is disaggregated by more than one type of derivative asset, the dimension “Derivative Instrument [Axis]” (**A2**) is intended to be used.
- “Retained Earnings (Accumulated Deficit)” (**L30**) is intended to be used to tag the value of distributable earnings.
- “Equity, Attributable to Parent” (**L31**) is intended to be used to tag the reported value of net assets excluding equity attributable to noncontrolling interests in the consolidated statement of assets and liabilities (balance sheet). “Equity, Including Portion Attributable to Noncontrolling Interest” (**L61**) is intended to be used to tag the value including noncontrolling interest in the statement of assets and liabilities when applicable. “Equity, Including Portion Attributable to Noncontrolling Interest” (**L61**) is expected to be used for the beginning and ending values reported in the consolidated statement of changes in net assets (equity) for all filers reporting equity or net assets representing capital as illustrated in Example 3. This provides consistent data for users between filers and over multiple periods for a filer if circumstances change.

- The line-item elements “Common Stock, Value, Issued” (**L24**), “Additional Paid in Capital” (**L29**), and “Retained Earnings (Accumulated Deficit)” (**L30**) are intended to be used to tag the values in the consolidated statement of assets and liabilities. Dimension elements are intended to be used for the disaggregation of total net assets (equity) in the consolidated statement of changes in net assets as illustrated in Example 3.
- “Common Stock, Shares, Outstanding” (**L28**) is intended to be used to tag the outstanding shares of common stock in the consolidated statement of assets and liabilities. The same line-item element is intended to be used with the dimension “Equity Components [Axis]” (**A3**) and “Common Stock [Member]” (**M8**) to tag the same value in the consolidated statement of changes in net assets as illustrated in Example 3. The intent of the tagging in the statement of changes in net assets is to align all common stock share values with the same member element to enable an automated reconciliation of the beginning balance and related activity during the period to the balance of common stock shares at the end of the period.

Example 2—Consolidated Statements of Operations

This Example illustrates the modeling for the consolidated statement of operations reported by an investment company.

ABC Company		
Consolidated Statement of Operations		
For the year ended December 31, 20X1		
(in thousands, except share and per share data)		
Investment income		
Dividend income—unaffiliated	L33, A1:M1	\$ 736
Dividend income—affiliated, controlled	L33, A1:M3	4
Dividend income—affiliated, not controlled	L33, A1:M4	2
Interest income paid in cash—unaffiliated	L34, A1:M1	109
Interest income paid in cash—affiliated, controlled	L34, A1:M3	50
Interest income paid in cash—affiliated, not controlled	L34, A1:M4	50
Interest income paid in kind—unaffiliated	L35, A1:M1	25
Interest income paid in kind—affiliated, controlled	L35, A1:M3	6
Interest income paid in kind—affiliated, not controlled	L35, A1:M4	13
Total dividend and interest income	L36	995
Other income	L37	6
Total investment income	L38	1,001
Expenses		
Base management fees	L39	(162)
Incentive fees	L40	(55)
Professional fees	L41	(29)
Administrative fees	L42	(20)
Interest expense	L43	(7)
Other general and administrative	L44	(2)
Total expenses, before expenses waived	L45	(275)
Fees paid indirectly	L46	4
Fees waived	L47	45
Total expenses, net of expenses waived	L48	(226)
Total net investment income before income tax	L49	775
Income tax expense on net investment income	L50	(31)
Total net investment income after income tax	L51	\$ 744
Realized gain (loss) and unrealized appreciation (depreciation) on investments:		
Net realized gain (loss) from:		
Investments in securities of unaffiliated issuers	L52, A1:M1	1,072
Investments in securities of affiliated issuers	L52, A1:M2	33
Call options written	L53, A2:M5	13
Swaps	L53, A2:M6	7

Figure 2.1 (continues)

ABC Company		
Consolidated Statement of Operations		
For the year ended December 31, 20X1		
Forward foreign currency contract	L53, A2:M7	(133)
Total net realized gain (loss) from investments	L54	992
Net changes in unrealized appreciation (depreciation) on:		
Investments in securities of unaffiliated issuers	L55, A1:M1	(1,300)
Investments in securities of affiliated issuers	L55, A1:M2	(57)
Call options written	L56, A2:M5	(50)
Swaps	L56, A2:M6	56
Forward foreign currency contract	L56, A2:M7	57
Total net unrealized appreciation (depreciation)	L57	(1,294)
Net realized and unrealized gain (loss) from investments	L58	(302)
Net increase in net assets resulting from operations	L59	\$ 442

Figure 2.3 (continued)

Notes:

- “Dividend Income, Operating” (**L33**), “Investment, Issuer Affiliation [Axis]” (**A1**), and the applicable member are intended to be used to tag the reported value of dividend income disaggregated by affiliation of the issuer of the investment. “Investment, Unaffiliated Issuer [Member]” (**M1**) is intended to be used to tag the value of dividend income from the investments in unaffiliated issuers. “Investment, Affiliated Issuer [Member]” (**M2**) is intended to be used to tag the value of dividend income from controlled and non-controlled investments in affiliated issuers if provided. “Investment, Affiliated Issuer, Controlled [Member]” (**M3**) is intended to be used to tag the value of dividend income from controlled investments in affiliated issuers. “Investment, Affiliated Issuer, Noncontrolled [Member]” (**M4**) is intended to be used to tag the value of dividend income from noncontrolled investments in affiliated issuers.
- “Net Investment Income” (**L49**) is intended to be used to tag the value of net investment income before tax. “Investment Income, Operating, Tax Expense (Benefit)” (**L50**) is intended to be used to tag the value of the tax expense (benefit) for net investment income. “Investment Income, Operating, after Expense and Tax” (**L51**) is intended to be used to tag the value of net investment income after tax.
- “Gain (Loss) on Sale of Derivatives” (**L53**), “Derivative Instrument [Axis]” (**A2**), and the applicable members are intended to be used to tag the reported gain (loss) on sale of derivatives disaggregated by type of derivative contract. “Call Option [Member]” (**M5**) is intended to be used to tag the gain (loss) on the sale of the call option. “Swap [Member]” (**M6**) is intended to be used to tag the gain (loss) on the sale of the swap contract. “Foreign Exchange Forward [Member]” (**M7**) is intended to be used to tag the gain (loss) on the sale of the foreign exchange forward.
- If reporting foreign currency transaction gains and losses, elements intended to be used may be found under “Realized and Unrealized Gain (Loss), Investment, Derivative, and Foreign Currency Transaction, Operating, after Tax [Abstract]” or “Realized and Unrealized Gain (Loss), Investment, Derivative, and Foreign Currency Transaction, Operating, after Tax, with Price Change [Abstract]” depending on election for reporting foreign transaction gains and losses.

- “Net Investment Income” (**L49**), “Realized Gain (Loss), Investment and Derivative, Operating, before Tax” (**L54**), and “Unrealized Gain (Loss), Investment and Derivative, Operating, before Tax” (**L57**) are intended to be used to tag the reported values of investment income and realized and unrealized gains (losses) on investments before tax in the consolidated statement of operations. “Investment Income, Operating, after Expense and Tax” (**L51**), “Realized Gain (Loss), Investment and Derivative, Operating, after Tax” (**L62**), and “Unrealized Gain (Loss), Investment and Derivative, Operating, after Tax” (**L63**) are intended to be used to tag the values after tax in the statement of operations when applicable. “Investment Income, Operating, after Expense and Tax” (**L51**), “Realized Gain (Loss), Investment and Derivative, Operating, after Tax” (**L62**), and “Unrealized Gain (Loss), Investment and Derivative, Operating, after Tax” (**L63**) are expected to be used for the values reported in the consolidated statement of changes in net assets (equity) for all filers reporting equity or net assets representing capital as illustrated in Example 3. This provides consistent data for users between filers and over multiple periods for a filer if circumstances change.

Example 3—Consolidated Statement of Changes in Net Assets

This Example illustrates the modeling for the consolidated statement of changes in net assets reported by an investment company.

Figure 3.3

Notes:

- “Equity, Including Portion Attributable to Noncontrolling Interest” (L61), “Equity Components [Axis]” (A3) and the applicable members are intended to be used to tag the reported value of net assets disaggregated by equity component. “Common Stock [Member]” (M8) is intended to be used to tag the value of common stock. “Additional Paid-in Capital [Member]” (M9) is intended to be used to tag the value of additional paid-in capital. “Retained Earnings [Member]” (M10) is intended to be used to tag the value of distributable earnings. Using “Equity, Including Portion Attributable to Noncontrolling Interest” (L61) in the statement of changes in net assets (equity) provides consistent data for users between filers and over multiple periods for a filer if circumstances change.
- While a dimensional model is used for the statement of changes in net assets (equity), line-item elements “Common Stock, Value, Issued” (L24), “Additional Paid in Capital” (L29), and “Retained Earnings (Accumulated Deficit)” (L30) are intended to be used to tag the values in the consolidated statement of assets and liabilities (balance sheet).
- “Common Stock, Shares, Outstanding” (L28) is intended to be used to tag the outstanding shares of common stock in the consolidated statement of assets and liabilities (balance sheet). The same line item (L28) is intended to be used with the dimension “Equity Components [Axis]” (A3) and “Common Stock [Member]” (M8) to tag the value in the consolidated statement of changes in net assets (equity). The intent of this tagging is to align all common stock share values with the same member element to enable an automated reconciliation by data users of the beginning balance and related activity during the period to the balance of common stock shares at the end of the period.
- “Investment Income, Operating, after Expense and Tax” (L51), “Realized Gain (Loss), Investment and Derivative, Operating, after Tax” (L62), and “Unrealized Gain (Loss), Investment and Derivative, Operating, after Tax” (L63) are expected to be used for the values reported in the consolidated statement of changes in net assets (equity) for all filers reporting equity or net assets representing capital as illustrated. This provides consistent data for users between filers and over multiple periods for a filer if circumstances change.

Example 4—Schedule of Investments in Securities of Unaffiliated Issuers

This Example illustrates the modeling for the schedule of investments in securities of unaffiliated issuers reported by an investment company.

ABC Company														
Schedule of Investments as of December 31, 20X1

Figure 4.3(c)

Notes:

- “Investment, Identifier [Axis]” (**A4**) is intended to be used to tag each issue of investment and its related information. The members used under this typed dimension are unique for each issue and are part of the instance document and not in the extension taxonomy. The typed dimension is intended to be used to associate the discrete information for each issue such as number of shares, principal amount, and interest rate together.
- “Investment Owned, at Fair Value” (**L1**), “Investment, Issuer Affiliation [Axis]” (**A1**), and “Investment, Unaffiliated Issuer [Member]” (**M1**) are intended to be used to tag the total of the fair value of investments in unaffiliated issuers. The element “Investment, Issuer Affiliation [Extensible Enumeration]” (**XL75**) along with “Investment, Identifier [Axis]” (**A4**) and the applicable unique member is intended to be used to communicate the affiliation for each issue. Using the explicit dimension, “Investment, Issuer Affiliation [Axis]” (**A1**), only for disaggregating totals provides users of the data with relevant summations.
- “Investment Type [Axis]” (**A5**), “Debt Securities [Member]” (**M11**), “Equity Securities [Member]” (**M12**) and the applicable line-item elements are intended to be used to tag the total value disaggregated by type of investment. The element, “Investment, Type [Extensible Enumeration]” (**XL77**) along with “Investment, Identifier [Axis]” (**A4**) and the applicable unique member is intended to be used to communicate the investment type for each issue.
- “Industry Sector [Axis]” (**A6**), “Technology Sector [Member]” (**M13**), “Healthcare Sector [Member]” (**M14**), “Real Estate Sector [Member]” (**M15**), “Insurance Sector [Member]” (**M16**), “Automotive Sector [Member]” (**M17**), “Financial Services Sector [Member]” (**M18**), and the applicable line-item elements are intended to be used to tag the total value disaggregated by type of industry sector. The element “Investment, Industry Sector [Extensible Enumeration]” (**XL83**) along with “Investment, Identifier [Axis]” (**A4**) and the applicable unique members is intended to be used to communicate the industry sector for each issue.
- “Geographical [Axis]” (**A7**), “US East Region [Member]” (**M19**), “US South Region [Member]” (**M20**), and the applicable line-item elements are intended to be used to tag the total value disaggregated by geographical area. The element, “Investment, Issuer

Geographic Region [Extensible Enumeration]” along with “Investment, Identifier [Axis]” (A4) and the applicable unique members is intended to be used to communicate the geographic region for each issue if reported.

- “Investment, Issuer Name [Extensible Enumeration]” (XL76) is intended to be used to tag the name of the issuer of the investment for each individual issue. If amounts are disaggregated by issuer and totals by issuer are reported, then the “Investment, Issuer Name [Axis]” and applicable members are intended to be used for the totals.
- “Investment, Variable Interest Rate, Type [Extensible Enumeration]” (XL80) along with “Investment, Identifier [Axis]” (A4) and the applicable unique members is intended to be used to tag the type of variable interest rate for each issue.
- The dimension “Investment, Issuer Affiliation [Axis]” (A1), and “Investment, Unaffiliated Issuer [Member]” (M1) are used with the “Industry Sector [Axis]” (A6) and “Geographical [Axis]” (A7) in Figures 4.1(b) and 4.1(c), respectively because the values are only for unaffiliated issuers and there are values for affiliated issuers that are reported but are not included in the example. If there are no affiliated issuers and the values represent report-wide values, the element “Investment, Issuer Affiliation [Extensible Enumeration]” (XL75) is intended to be used instead of the dimension to communicate that all the values are for unaffiliated issuers.

Example 5—Investments in Affiliates

This Example illustrates the modeling for investments in affiliates reported by an investment company.

Figure 5.3

Notes:

- “Investment, Identifier [Axis]” (**A4**) is intended to be used to tag each issue of investment and its related information. The members used under this typed dimension are unique for each issue and are part of the instance document and not in the extension taxonomy. The typed dimension is intended to be used to associate the discrete information for each issue such as fair value of investment, gross additions, and gross reductions together.
- “Investment Owned, at Fair Value” (**L1**), “Investment, Issuer Affiliation [Axis]” (**A1**), and the applicable member are intended to be used to tag the total values of investments disaggregated by affiliation of the issuer of the investment. “Investment, Affiliated Issuer [Member]” (**M2**) is intended to be used to tag the total fair value of investments in controlled and noncontrolled affiliated issuers. “Investment, Affiliated Issuer, Controlled [Member]” (**M3**) is intended to be used to tag the total of fair value of investments in controlled affiliated issuers. “Investment, Affiliated Issuer, Noncontrolled [Member]” (**M4**) is intended to be used to tag the total of fair value of investments in noncontrolled affiliated issuers. The element “Investment, Issuer Affiliation [Extensible Enumeration]” (**XL75**) along with “Investment, Identifier [Axis]” (**A4**) and the applicable unique member is intended to be used to communicate the investment type for each issue by affiliation.
- The element “Investment, Type [Extensible Enumeration]” (**XL77**) along with “Investment, Identifier [Axis]” (**A4**) and the applicable unique member is intended to be used to communicate the investment type for each issue.
- “Investment, Issuer Name [Extensible Enumeration]” (**XL76**) is intended to be used to tag the name of the issuer of the investment for each individual issue. If amounts are disaggregated by issuer and totals by issuer are reported, then the “Investment, Issuer Name [Axis]” and applicable members are intended to be used for the totals.
- “Investments in and Advances to Affiliates, at Fair Value, Gross Additions” (**L93**) is intended to be used to tag the gross additions to the investments in and advances to the affiliates including, but not limited to, the cost basis of the investments, any transfers of investment into a specific category, the net realized gain, and net changes in unrealized appreciation on investments.

- “Investments in and Advances to Affiliates, at Fair Value, Gross Reductions” (L94) is intended to be used to tag the gross reductions to the investments in and advances to the affiliates including, but not limited to, the cost basis of the investments, any transfers of investment out of a specific category, the net realized loss, and net changes in unrealized depreciation on investments.
- The additional information for the schedule of investments for affiliated issuers is not illustrated but would follow the modeling as shown for unaffiliated issuers in Example 4 using the members for affiliated issuers as applicable.

Example 6—Schedule of Open Forward Foreign Currency Contracts

This Example illustrates the modeling for the disclosure of open foreign currency forward contracts reported by an investment company.

ABC Company													
Foreign Currency Forward Contracts													
As of December 31, 20X1													
(in thousands)													
<u>Derivative instrument description</u>		<u>Notional amount to be purchased</u>		<u>Notional amount to be sold</u>		<u>Counterparty</u>		<u>Settlement date</u>		<u>Unrealized appreciation (depreciation)</u>			
A8:Counterparty XYZ Company Settlement Date 1/18/2022													
XL4	Foreign currency forward contract	L96	\$	56	L97	CAD	72	XL98	XYZ company	L99	1/18/2022	L100	(1)
A8:Counterparty XYZ Company Settlement Date 2/17/2022													
XL4	Foreign currency forward contract	L96	\$	59	L97	CAD	70	XL98	XYZ company	L99	2/17/2022	L100	(1)
A8:Counterparty XYZ Company Settlement Date 3/18/2024													
XL4	Foreign currency forward contract	L96	\$	11,827	L97	AUD	15,410	XL98	XYZ company	L99	3/18/2024	L101	427
Total											L3	<u>\$</u>	<u>425</u>
Currency Abbreviations:													
\$ - U.S. Dollar													
CAD - Canadian Dollar													
AUD - Australian Dollar													

Figure 6.1

The legend for the elements used to tag these facts follows:

	<u>Standard Label</u>	<u>Balance Type</u>	<u>Period Type</u>	<u>Element Name</u>
A8	Open Forward Foreign Currency Contract, Identifier [Axis]		Duration	OpenForwardForeignCurrencyContractIdentifierAxis
	Counterparty XYZ Company Settlement Date 1/18/2022			
	Counterparty XYZ Company Settlement Date 2/17/2022			
	Counterparty XYZ Company Settlement Date 3/18/2024

L100	Derivative Asset, Subject to Master Netting Arrangement, Liability Offset	Unrealized depreciation	1000	1000		
L101	Derivative Asset, Fair Value, Gross Asset Including Not Subject to Master Netting Arrangement	Unrealized appreciation			427000	
L3	Derivative Asset	Total derivative asset				425000
	Date context		20X1-01-01 to 20X1-12-31			
L99	Derivative, Contract End Date	Settlement date	2022-01-18	2022-02-17	2024-03-18	

Figure 6.3

Notes:

- “Open Forward Foreign Currency Contract, Identifier [Axis]” (**A8**) is intended to be used to tag each contract and its related information. The members used under this typed dimension are unique for each contract and are part of the instance document and not in the extension taxonomy. The typed dimension is intended to be used to associate the discrete information for each contract such as notional amount, counterparty, and settlement date together.
- “Derivative Asset, Counterparty Name [Extensible Enumeration]” (**XL98**) and “Derivative Asset, Type [Extensible Enumeration]” (**XL4**) are intended to be used to tag the counterparty name and type of derivative contract for each unique contract.
- The identification of the currency would be provided in the units as applicable.
